**‘TWO WEEKS WORKSHOP ON RESEARCH METHODOLOGY AND
PRACTICE’ FOR TEACHERS AND RESEARCH SCHOLARS’**
18th March 2023- 31st March 2023

ABOUT PROPOSED WORKSHOP: Research is the process for producing relevant knowledge for the society. However, maintaining the quality of research has always been a big challenge. Researchers and academicians across the borders are facing the challenge for maintaining the quality of research both in following scientific research methodology as well as publication of research output in quality Journals. Unlike Developed nations, India too is trying to reinforce the quality of research by prioritizing in its latest education policy. The National Education Policy (NEP) 2020 intends to revamp the whole education system including research. The NEP 2020 envisions the establishment of a National Research Foundation (NRF) with the aim of allowing a culture of research at universities. However, quality research is possible only when the researchers undergo systematic training in research methodology. A good research methodology is key to sound research output and quality publication in peer-reviewed journals. Research methodology workshops may play important role in understanding the required concepts for fostering research and innovation in the world. Research methodology is a structured framework of conducting research in order to address various issues and to solve problems in a scientific way. Therefore, it is imperative for researchers to understand research methodology and applications of contemporary statistical techniques for conducting research.

In recognition of the need for reorienting and upgrading the research abilities of young faculty members/research scholars of social sciences and inter-disciplinary areas, MDU Centre of Professional and Allied Studies, Gurugram in collaboration with Faculty Development Centre, M.D. University, Rohtak is organizing an advance **‘Two Weeks Workshop on Research Methodology and Practice’**. The primary objective of the workshop is to enhance the research skills of faculty members/research scholars and to provide them an opportunity to get themselves trained in the methodology of research. The workshop will be conducted from 18th March 2023- 31st March 2023.

This two-week workshop on research methodology and Practice will help the researchers and academicians in selecting the relevant topic for research in their domain, formulation of a research problem, formulation and testing of hypothesis, data collection, selecting the statistical method for data analysis, and communicating the research output. Advanced statistical tools with the help of latest software will be practiced by the researcher in this workshop. Participants will also learn the mechanics of impactful communication of research output, quality publication, and

research ethics. Special sessions for Reference Management Software like Mendeley, Zotero, and EndNote software will be organized in this workshop.

OBJECTIVES OF THE WORKSHOP: The proposed Research Methodology and Practice workshop intends to strengthen the academic talent pool of young academicians and researcher scholars enrolled in Ph.D. programs at any recognized universities/research centres. The aim is to reach out to researchers from different social science disciplines to impart an interdisciplinary approach to capacity building. Key objectives of the proposed workshop are:

1. To enable the participants in understanding the relevance of research for society and selecting the issue/topic relevant to the society for the research.
2. To enable the participants to understand and define the research problem and select of suitable research design.
3. To appraise participants with the latest methods of data collection, processing, interpretation, and analysis for qualitative and quantitative research
4. To sensitize participants on the ethical aspects of research as well as plagiarism.
5. To assist the participants in quality academic writing including dissertation and research reports
6. To enable the participants in publishing quality research papers in high-impact factor peer-reviewed journals.
