

Name of the Department/Centre/Institute - Centre for Medical
Biotechnology

Name of the Course - Laboratory Animal Experimentation

Semester.....

Course Code	24 MBT-EEC01	Course Credits	(L: 2 T: 0 P: 0)
Max. Marks	50	Time of end term examination	8 Hours
Learning Objectives: 1. To educate the students on the needs, concepts and principles of laboratory animal experimentation 2. To give students virtual experience of injections and surgical procedures 3. To give students experience with anesthesia and analgesia in laboratory animals. 4. To provide students the current guidelines of CPCSEA regarding animal experimentation 5. To educate the students about the alternatives to animal usage			
Learning Outcomes: The students will develop 1. A holistic perspective of designing and execution of laboratory animal experiments 2. An understanding of the principles of anesthesia and analgesia 3. Understanding how to care and manage laboratory animals 4. Information on 3 R's principle in laboratory animal field 5. Alternatives to lab animal research			
Unit-I			
Introduction and scope of Animals in biomedical research, General biology and taxonomy, CPCSEA and IAEC regulatory guidelines, Ethics in Lab animal research, 3 R concept in experiment designing, Alternatives to animal use			
Unit-II			
Biology and husbandary of laboratory mice, rat & rabbit, Sterilization and disinfection technique, Biosafety and occupational hazard, Quality control in lab animals			
Unit-III			
Mice, Rat, Rabbit handling and restraining methods, Different injections techniques, Blood collection techniques, Anesthesia and analgesia, Euthanasia methods			
Unit-IV			
Animal acquisition and maintenance of records, Accreditation of animal facilities, Selection, care, and management of breeding stock for commercial purpose, Care of new born & growing stock, Disposal of wastes
